

TUFF Solutions for

Pedestrian Traffic Decking

TUFFLEX Pedestrian Traffic Deck Systems provide versatile and durable waterproofing protection to both concrete and plywood substrates.

TUFFLEX Pedestrian Traffic Deck Systems:

- Provide Seamless Waterproofing
- Provide UV & Weather Protection
- Prevent Deterioration of Wood or Concrete
- Stop Scaling and Spalling of Concrete
- Reduce Maintenance Costs
- Provide Skid Resistant Surfacing

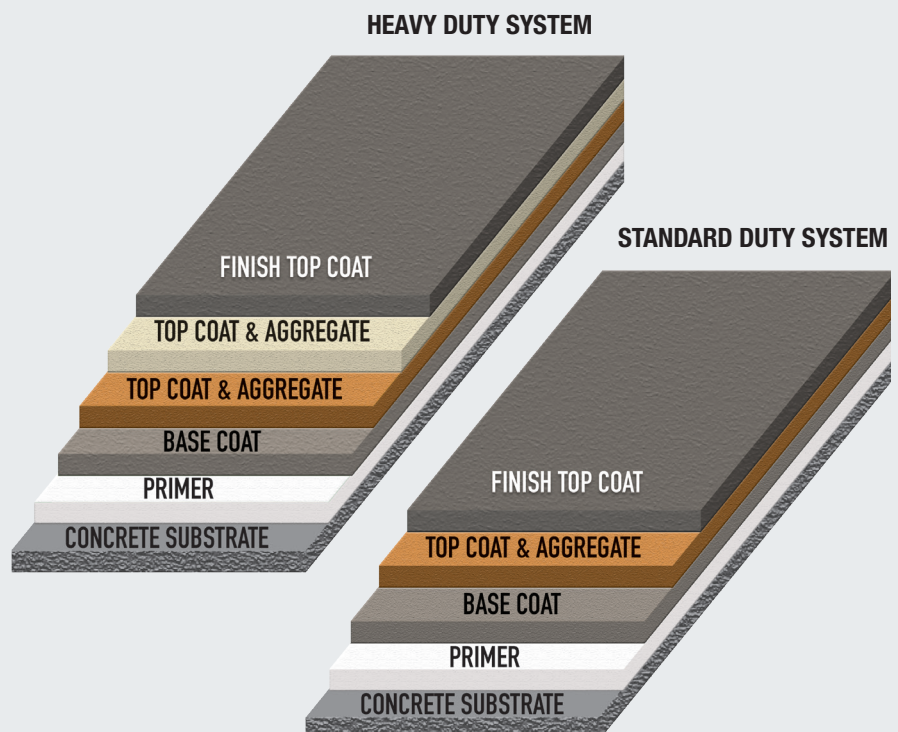

Vehicular Traffic Decking

TUFFLEX Vehicular Traffic Deck Systems:

- Hold up to UV Exposure and Heavy Vehicular Traffic
- Provide Seamless Waterproof Protection
- Prevent Rebar Deterioration
- Stop Scaling and Spalling of Concrete
- Reduce Maintenance Costs

TUFFLEX Vehicular Traffic Deck Systems have provided the toughest protection for vehicular traffic decks world wide for more than 30 years.

TUFF Against Cracks Anti-Fracture Waterproofing

TUFFLEX Anti-Fracture System:

TUFFLEX Anti-Fracture Waterproof Membrane Systems provide waterproofing and crack resistance for below tile and paver applications:

- Provide Seamless Waterproofing
- Reduce Cracking in Tile & Grout
- Provide a Bondable Surface for Thin-Set and Mortars

Hybrid Polyurea Quick Cure Waterproofing

TUFFLEX UREA-TUFF 4200 Hybrid Polyurea Systems:

- Pedestrian & Vehicular Traffic Deck Systems
- Provide Seamless Waterproofing for demanding decks
- Provide Two-Component Rapid Cure Coatings
- Demonstrates excellent adhesion, impact and abrasion resistance
- Suitable for surfaces subject to demanding environmental exposure

System Selector Guide

Pedestrian Traffic Deck Coating Systems

| TUFFLEX Pedestrian System: | Thickness: | Rating: | Use: |
|----------------------------|------------|---------------|---|
| TUFFLEX "TUFF" on Concrete | 64 Mils | Standard Duty | Pedestrian Traffic over Concrete |
| TUFFLEX "TUFF" on Plywood | 80 Mils | Heavy Duty | Pedestrian Traffic over Plywood |
| ELASTA-TUFF 5000/6000 X-2 | 68 Mils | Heavy Duty | Pedestrian Traffic over Concrete or Plywood |

Vehicular Traffic Deck Coating Systems

| TUFFLEX Vehicular System: | Thickness: | Rating: | Use: |
|----------------------------|------------|---------------|--|
| ELASTA-TUFF System 566-VEH | 50 Mils | Standard Duty | Vehicular Traffic over Concrete |
| ELASTA-TUFF System 566-VHD | 60 Mils | Heavy Duty | Heavy Duty Vehicular Traffic over Concrete |

Hybrid Polyurea Deck Coating Systems

| TUFFLEX HPDC System: | Thickness: | Rating: | Use: |
|----------------------|------------|---------------|---|
| UREA-TUFF 4200-PT | 47 Mils | Moderate Duty | Pedestrian Traffic over Concrete or Plywood |
| UREA-TUFF 4200-VT | 60 Mils | Heavy Duty | Vehicular Traffic over Concrete |

Anti-Fracture Waterproofing Membranes

| TUFFLEX AFWM System: | Thickness: | Rating: | Use: |
|--------------------------------|------------|---------------|--|
| TUFFLEX System AFWM-64 Mil | 64 Mils | Standard Duty | Under Tile over Concrete Surfaces (Pedestrian Traffic) |
| TUFFLEX "Flex Mesh" Under Tile | 1/4 inch | Heavy Duty | Under Tile over Plywood Surfaces (Heavy Pedestrian) |

Your Partner in Waterproofing Solutions

Exterior surfaces are exposed to the same elements that turn boulders into dust and steel into rust. TUFFLEX Polymers has over thirty years experience in manufacturing specially engineered coatings that provide proven solutions to the toughest waterproofing challenges. TUFFLEX engineers waterproofing systems for use in the coldest, wettest and most abusive environments. The TUFFLEX state of the art formulated product line of high performance, synthetic and renewable materials provides economical, practical, and TUFF solutions to protect today's structures from the deteriorating affects of the environment.

☒ Green Solutions:

TUFFLEX Polymers manufactures LEED qualifying, low V.O.C. systems for sustainable and environmentally sensitive waterproofing.
